It would seem that when changes were made to support tourism in our state that the powers that be decided that hotels could open on Sundays as well as other week days South Australia supported no drinking on the Sunday then the poker machines came in the scene and now we have gambling and drinking from 08:00 to 08:00 it seems to myself [if I am the only one] that the easy solution is to reduce the gambling hours and therefore you will reduce the drinking hours as well?

Am I the only person in South Australia that sees such a simple solution to the problem.

Regards
